 Site Control 1

Bulk Energy Storage Scheduling and Dispatch Rights Request for Proposals

APPENDIX C1

Project Overview

Please provide the following Project information in the order requested. Indicate if a question is not applicable and do not leave responses blank. The location identified in Phase One is binding, or in the case of a Portfolio submission the location of the Reference Project is binding. In Phase Two the locations of all Projects within a Portfolio must be described with site control demonstrated.

1. Project Name
2. Site Name (if different from Project Name)
3. Project Street Address, City, State, Zip
4. Project Latitude, Longitude
5. Project parcel numbers
6. Site location map(s) clearly showing the location, size, and orientation of the site; the location of the expected electrical interconnections and voltages for charging and discharging and, if applicable, fuel and water.
7. Site location map(s) clearly showing the location of schools, hospitals, airports, churches, or other expected sensitive public assembly locations within a radius of 1,000 feet from the site.

Site Control

Please provide the following Project information in the order requested. Indicate if a question is not applicable and do not leave responses blank. Include all relevant information regarding status during Phase One. Actual site control must be demonstrated during Phase Two. Without appropriate site control documentation, the Offer will be disqualified.

1. Describe merits of proposed site/location.
2. Discuss status of site control, including required easements. For Phase Two, please also provide proof of control of the proposed property site. Note that the site control documentation should be in the name of the entity that will sign the Agreement. If not, please provide explanation.
3. Specify the legal property interests through which the Bidder has control over the land on which the Project, and other appurtenances required for the construction, operation and maintenance of the Project, will be situated for the entire term of the proposed Agreement. "Interests" may include fee ownership, leasehold or easement interest, or other valid and enforceable real estate interest that permits the use of the land for the purposes contemplated by the Agreement and may be existing or exercisable options. If interests are contingent, please specify the nature and timing of the contingencies.

Bulk Energy Storage Scheduling and Dispatch Rights Request for Proposals

4. Please provide a preliminary site layout, accounting for local zoning rules for the proposed Project and demonstrate Project details, including:
 - a. The proposed location of the battery assets in respect to the property boundary, including clearly demonstrating required buffers as dictated by local zoning and Governmental Authority requirements.
 - b. A zoning analysis, including bulk table requirements and identified area and use variances that exist or may be required.
 - c. An inventory of current site conditions considering any environmental or wetland constraints.
 - d. Details of how State Environmental Quality Review Act (SEQRA) requirements are met. A detailed description of the steps and schedule to receive a SEQRA Determination, if required, should be included for consideration in the evaluation of Project viability.
5. Provide current (no greater than 6 months from Offer submittal date) preliminary title reports for the lands on which the Project and other appurtenances required for the operation and maintenance of the storage facility are located.
6. Provide any survey drawings completed for the Project and appurtenances required for the operation and maintenance of the storage facility. In addition, identify any such required surveys that have not been completed and any that are in process with known or estimated completion dates.
7. Provide all environmental due diligence undertaken for the proposed site, including without limitation, all Phase I Environmental Site Assessments (prepared in accordance with the most recent ASTM E-1527 standard) and the results of all environmental testing obtained or conducted. Providing such information as required hereunder shall be for informational purposes and shall not be construed as shifting any costs or liability for environmental matters to any of the Companies.
